ELAS

After the incredible experience in the recording of the album "Ventre", Munir Hossn felt even more inspired by the feminine musical energy, filled with so many colors, virtuosity and sensitivity. He even confessed that he could spend his life singing to the greatness of the feminine being.

Those feelings led him to compose for this new project and album "Munir Hossn & Elas", songs where emotion embraces the intellect and allows memories and desires to dance together, turning the sounds of their instruments into a single voice celebrating art, music and love.
